SUMMARY

Cyber Security Specialist with 5 years of experience in securing cloud environments, optimizing Azure security, and managing enterprise-scale migrations. Skilled in risk assessment, compliance enforcement, automation, and building intelligent operational solutions. Supporting AI-driven initiatives and automation projects to improve cloud reliability and security posture.

TECHNICAL SKILLS

Azure Network Security: Azure Firewall, Azure Web Application Firewall, VPN Gateway, ExpressRoute, Virtual WAN (VWAN), NSGs, UDRs, VNETs, Application Gateway, DDoS Protection, Secure Hybrid Connectivity.

Cloud Security and Logging : Fortinet, CheckPoint, Palo Alto Firewalls, Private Endpoints, Private Link, Azure KeyVault, Disk Encryption Set, Azure VWAN-integrated Network Virtual Appliances, Azure CIS Benchmark, Log Analytics Workspace, KQL, Microsoft Copilot for Defender.

Soft Skills: Security Risk Management, Stakeholder Communication, Incident Response, Security Training, Process Optimization.

Applied AI & Automation: LLM Deployment, AI Agent Workflows, Prompt Engineering, n8n Automation, AI Copilot Development, Retrieval-Augmented Generation (RAG), Python for AI Automation, REST API Integrations, Workflow Orchestration, Open-Source LLM Experimentation, AI Model Parameter Tuning.

WORK EXPERIENCE

Cyber Security Specialist & AI Automation Engineer — Cloud Practice Team

August 2022 – Present

HCL Technologies, Noida

- Led **5+ Azure Landing Zone** implementation projects, strengthening enterprise cloud security, ensuring regulatory compliance, and minimizing risk across multi-environment deployments.
- Currently developing an **AI-powered Copilot for Azure Network Troubleshooting** (in creation phase), aimed at enabling automated root-cause analysis and intelligent remediation suggestions using LLM-driven workflows.
- Designed and deployed **best practice network architectures**, including **Hub-Spoke topology** and **Azure Virtual WAN (VWAN)**, enabling scalable, resilient, and secure connectivity.
- Secured large-scale cloud infrastructures by integrating industry-leading firewalls including **Fortinet, CheckPoint, and Palo Alto**, significantly enhancing threat detection capabilities and reducing incident response times.
- Configured **Syslog, SNMP, and TACACS** across firewall appliances to improve real-time monitoring, centralized logging, and secure authentication mechanisms.
- Successfully migrated **40+ Site-to-Site VPN tunnels** and **500+ servers** from CNF data center to Azure, coordinating with B2B vendors to ensure a seamless and secure transition.
- Collaborated cross-functionally with **stakeholders, DevOps, and compliance teams** to embed security best practices into CI/CD workflows, reducing misconfiguration risks and policy violations.
- Conducted comprehensive **Azure Landing Zone assessments**, identifying and addressing gaps in security posture, and aligning configurations with CIS and NIST benchmarks.
- Deployed **Azure Web Application Firewall (WAF)** and **Application Gateway** to protect web-facing applications against OWASP Top 10 threats, significantly improving application-layer defenses.
- Enhanced security and performance of cloud networks by optimizing **Azure Virtual WAN (VWAN)** with integrated **Network Virtual Appliances (NVAs)**, minimizing attack surface and ensuring centralized security management.
- Delivered hands-on training sessions to **50+ employees**, increasing organizational awareness of cybersecurity principles and promoting a proactive security culture.

- Worked on **Proof of Concept (PoC)** for **Microsoft Copilot for Defender**, exploring AI-driven threat intelligence and automated response capabilities in emerging cybersecurity technologies.
- Configured and optimized **Azure ExpressRoute Private Peering** and **Microsoft Peering**, ensuring secure, high-throughput hybrid connectivity for enterprise workloads.

MHRD BOAT Trainee
Wipro Limited, Gurgaon

July 2018 – July 2019

- Conducted thorough **User Acceptance Testing (UAT)** for **50+ VLAN** configurations and enterprise applications, ensuring deployment readiness and minimizing post-deployment issues.
- Managed end-to-end patching cycles and implemented proactive security maintenance for over **1000+ end-user systems**, significantly reducing system vulnerabilities and enhancing endpoint protection.
- Contributed to **2 large-scale desktop migration projects**, streamlining user transition to upgraded systems and improving overall device performance, reliability, and security compliance.

CERTIFICATIONS AND TRAININGS

- **Microsoft Certified: Azure Network Engineer Associate (AZ-700)**
- **Microsoft Certified: Azure Solutions Architect Expert (AZ-305)**
- **Microsoft Certified: Azure AI Engineer Associate (AI-102)**
- **ITIL 4 Foundation Certification**

EDUCATION

B.Tech in Information Technology <i>Bundelkhand Institute of Engineering and Technology, Jhansi</i>	July 2022
Polytechnic Diploma in Information Technology <i>Hewett Polytechnic Lucknow, Lucknow</i>	June 2018
High School <i>Sacred Heart Convent High School, Khajuraho</i>	April 2014

TECHNICAL INTERESTS

- Operating a self-hosted **AI & Virtualization Homelab** built on Proxmox Hypervisor for testing cloud architectures, security tools, distributed systems, and private AI workloads.
- Experimenting with **open-source AI models and automation frameworks** to deploy local LLMs, build practical AI agents, and design intelligent workflow automations.
